

Industrial Visit – UiTM students

Auto Global has received a request from UiTM students to visit the manufacturing plant for industrial exposure. The purpose of the visit is to expose students to occupational safety and health in the working environment as well as to fulfil the course requirement.

Since the industrial visit is now considered as part of the curriculum activities for the development of the students, AG has accepted the request and scheduled a visit for 5 mechanical engineering students on 8th May 2023, where the Talent Management team welcomed them to the HQ Office.

A short briefing and introduction about the Company by the Talent Management team.

The plant tour is led by Mr Ng Boon Heng, Senior Maintenance Manager, Mr Sunarto Bin Suyanti, Safety Supervisor,

Throughout the visit, we provided them with enough information about standard procedures, processes, work efforts and safety and health measures implemented at our company.

This should enable the students to get a clear picture about of the working culture and methods followed by our Company. In addition, they should gain hands on practical knowledge of industrial processes and management concepts.

Photo session with UiTM Students.
