

Title: Empowering Industry 4.0: MSF 4.0 Tech Month and the Malaysian Smart Factory 4.0 Initiative

From September 26th to 27th, 2023, the Malaysian Smart Factory (“MSF”) 4.0 Tech Month, organized by the Selangor Human Resource Development Centre (“SHRDC”) and in collaboration with the MSF 4.0, brought together ten pioneering companies all contributing to the knowledge and growth of Industry 4.0. Among these industry leaders was Auto Global Parts Industries Sdn Bhd (“AGP”), which played an important role in shaping the landscape of smart manufacturing alongside other companies such as Omron, ViTrox, TIME, Ifm, Advantech and others.

The MSF 4.0 Tech Month served as a dynamic platform for knowledge exchange, fostering innovation, and boosting company collaboration, encapsulating the fundamentals of Industry 4.0 - automation, data exchange, IoT, and more, to take us into the future of manufacturing.

AGP took center stage during a critical sharing session, showcasing its expertise and experience in implementing advanced manufacturing technologies. AGP experts provided insights into how AGP has successfully integrated technology into its operations, optimizing processes, increasing efficiency, and ensuring the highest quality standards.

As a recognition of their contributions to the success of the MSF 4.0 Tech Month, all ten participating companies were awarded Innovation Award certificates, further reinforcing their active involvement in the collective effort to drive the smart manufacturing revolution.
